Call for Nachttanzdemo-nightydancingmanifestation

Musik **creates** free-spaces

This appeal addresses to all people which are involved and stand for free spaces, free arts and culture and (GEMA)free music. Those who practice selforganized structures und those who wanna speak out loud and stand up for a right of city for erveryone and those who think that the beauty of life can only be made and lived by ourselves and is not to be sold.

Music is one of our priorities as we understand it as a very pure instrument of human communication ability and it shows us how social life plays its games with us – music is a media of emotion and brings people socially together – it unites us in life.

Therefor we're holding the nightydancingmanifestation on *Fête de la Musique*. Since five years we've been demonstrating that we are not accepting with a destructive attitude towards music and a form of politics standing that levells down and softens up, produces sweet ice and white sheep one like another and please don't have any grey shadow. Instead we show our black flags and want to show that music is something vivid and dynamic – just as our lifes and we are – and that we therefor are fighting for our free spaces and its culture that is involving it.

What unites us is the wish to make noncomercial culture and emancipatory politics possible. We want to lead a self-determined life – we want to liberate from mechanisms of oppression and suppression or conditions in which abuse of power and exploitation are dominant. We have to counter this and strengthen our offense in which it is possible to realize our own interests in music and its befriended culture in peace – !without ! profit planning and profitability optimization, pressure to perform or streamling.

We fight against the expulsion and driving away of free spaces of our culture and music. We're creating space for wild and diverse action and subculture in public space. The right to move and and stay or settle are certainly a matter of cours for us. The right of enjoyment, delight, free awareness of life and „joie de vivre“ anyway! We want a city that has more to offer than consumption utilization. And we won't let

ourselves be criminalized for that !

Those who can identify with these lines are very welcome to demonstrate with us ... and to dance with us!

To hammer our claims, we will dance on deep basses through the streets and with our spotlights we'll illuminate the dark madness.

Join the „Nacht-Tanz-Demo“ on June 21st! Be creative, bring signs, sound systems, dress up as you like, .. Feel free to participate in expressing your ideas of freedom and the beauty of life and much or tell and show us what bothers you.

Let us make the city tremble and let us show that we're there and not going to step back behind!

The nightdancingmanifestation is going to start on June 21st at 10pm at Wagenplatz Scheffelstraße (21), in front of Villa Kuriosum at S-Bahn-Brücke (where Berlin Lichtenberg and Friedrichshagen are meeting).
